

Course Summary:

Addressing the Wound Healing Continuum: Assessment, Treatment and Continuity of Care

Pressure ulcers account for an increasing proportion of healthcare costs. The wound healing continuum is dependent upon many factors provided by a multi-disciplinary woundcare team. Wound physiology, assessment, treatment options and education will be addressed, with special emphasis placed on prevention and improving patient outcomes.

Dynamic Seating and Positioning: Facilitating the Ready Posture

Review the basic steps to seating assessment and apply principles of dynamic seating to a variety of situations. Get a chance to practice hands on evaluation techniques and product applications! Help to understand new Medicare funding guidelines.

May 17, 2006

W. Darren Hammond, MPT, CWS

has held clinical positions over the country for the past thirteen years. Darren has also held faculty appointments at various Physical Therapy programs in the Philadelphia region. He is currently a Clinical Applications Manager in the Training and Education Department for The ROHO Group Inc. In addition to wound care, Darren's focus of treatment has been in the rehabilitation of individuals with spinal cord injuries. Throughout his career, Darren has had extensive experience with seating and positioning, pressure mapping and cushion and wheelchair prescription. He is a Fellow in the Associate for the Advancement of Wound Care and has lectured nationally and internationally on the subject of chronic wound healing and seating and positioning options.
